EDUCATION

McMaster University

Bachelor of Technology, Software Engineering Technology

Hamilton, ON

Part-time

George Brown Polytechnic

Advanced Diploma, Computer Programming and Analysis

Toronto, ON

Apr 2025

EXPERIENCE

Software Developer

Exchange Solutions Inc.

May 2025 – Present

Toronto, ON

- Build and maintain backend services for a production loyalty platform using AWS serverless architecture (Lambda, API Gateway, SQS, EventBridge) and TypeScript
- Develop and integrate event-driven workflows across distributed microservices, supporting reliable data processing and system scalability
- Improve system performance and maintainability by optimizing APIs, refactoring service logic, and debugging issues across multiple services
- Improved code reliability by implementing automated testing (unit, end-to-end with Playwright and Robot), conducting code reviews, and monitoring production systems
- Deliver features end-to-end in collaboration with product, QA, and engineering teams within an agile development cycle

Software Developer Intern

Exchange Solutions Inc.

May 2023 – Aug 2024

Toronto, ON

- Prototyped Retrieval-Augmented Generation (RAG) systems using Node.js and OpenAI APIs to accelerate internal exploration of generative AI use cases
- Partnered with the Director of Innovation Labs to evaluate emerging AI technologies through rapid experimentation, informing product direction and production feasibility

Front-End Developer Intern

PresenTEC Solutions

Dec 2022 – Apr 2023

Vaughan, ON

- Maintained and enhanced company website using WordPress and custom frontend development
- Implemented UI improvements aligned with brand guidelines to improve consistency and usability

PROJECTS

Nest | TypeScript, Next.js, React, Prisma, PostgreSQL, NextAuth, Stripe, SnapTrade, Playwright, Vitest

- Built a full-stack personal finance platform consolidating investment accounts, portfolio tracking, and financial insights into a unified dashboard
- Developed using Next.js (App Router), TypeScript, and PostgreSQL with secure authentication via NextAuth
- Integrated SnapTrade to connect brokerage accounts (e.g., Wealhtsimple, Questrade) and sync holdings, implementing webhook verification, idempotent processing, and sync state management
- Implemented Stripe subscription billing with server-side entitlements and automated testing (Vitest, Playwright) to ensure reliability of billing and sync workflows

Duordle | TypeScript, React, Node.js, Express, MongoDB, Socket.io, Docker, Jest

- Developed a real-time multiplayer word game using WebSockets to enable synchronized, collaborative gameplay
- Containerized the application with Docker to enable consistent deployment and scalability
- Implemented unit testing with Jest and CI/CD workflows to ensure reliability and maintain code quality

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C#, SQL, Bash, HTML/CSS

Frameworks: Node.js, Express, React, Next.js, Tailwind CSS, Spring Boot, .NET

Databases: PostgreSQL, MySQL, MongoDB, Oracle SQL, SQLite, Snowflake

Developer Tools: AWS, Docker, Git, GitHub, Vercel, Jenkins, Postman, Stripe, Jira, Confluence, Bitbucket

Certifications: AWS Certified Cloud Practitioner, Bloomberg Market Concepts (BMC)
